

Thank you for choosing our products

DewZap is a Dual Channel Dew Heater Controller. Easy to use, powerful and very compact, is your best companion against the dew during long astro-nights. Controller has two individual RCA outputs. You can adjust its output by turning each knob on the top of the controller. Controller has been built with modern digital electronics and fully supports PWM duty cycle control. Powerful mosfets inside the controller provide 5 Amps per channel.

What is inside the box.

- 1 x DewZap Controller
- 1 x Cigarette Lighter Power Supply adapter to 2.1 DC socket (8 Amps slow fused)

Operating Instructions

- Plug in your heaters in the PWM outputs
- Connect 12V DC power supply to DewZap. A red light will turn on indicating the controller is up and running.
- Use the two knobs to adjust the power output of the heater A or heater B

Technical Specifications

Supply Voltage	12-15V DC
Output	Same input voltage in Pulse Width Modulation Duty Cycle
Channels	2 Digital
Power Outlets	2 x RCA
Power Input Connector	2.1mm Centre Positive Socket
Dimensions	66 mm x 66 mm x 28 mm

Device is covered by one (1) year warranty
