

QUICK INSTALLATION GUIDE

Thank you for choosing our product

The evolution of technology in astronomy requires a system which will assist the focusing of the telescope with great accuracy. Fast optics and modern camera devices require automatic focusing in every small period of time as temperature can affect focal length and modify the optimal focus position. Pegasus **FocusCube** has been developed to meet these requirements.

Designed in high quality with modern electronics it can provide digital precise focus control from a PC. FocusCube includes a stepper motor for absolute position focusing. Electronics and stepper motor are enclosed in a compact sized box.

Available Brackets: Universal L shaped | SCT

Operating Instructions:

- Plug the temperature sensor to the RJ45 socket.
- Plug the supplied USB type B cable to the device.
- Plug DC 12V/1-2Amps power cable into the DC 2.1mm socket.
- Device will boot after three seconds and the green indication LED will blink three times. This means that firmware was loaded successfully and the "FocusCube" is now fully operational.
- Download USB drivers, standalone software or ASCOM drivers from pegasusastro.com/support in order to connect to the device.

Observer's Hint: Order up the optional Hand Controller and focus your telescope using the digital encoder knob.

What is in the box:

- 1 x FocusCube
- 1 x DC Cable (2.1m) to Cigarette Lighter (3A fused)
- 1 x USB2 Cable Type B (1.8 meters)
- 1 x Temperature Sensor
- 1 x Blue Anodized Bracket (Universal L shaped or SCT model)
- Different sizes of bolts and spacers

Optional Accessories:

- Hand Controller

Device is covered by one (1) year warranty
Designed and Assembled in Greece
